

PRABAL SINGH

San Jose, California | (408) 210-4700 | prabals.0111@gmail.com | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Junior pursuing a B.S. in Engineering Technology at San Jose State University with hands-on experience in network configuration, systems administration, cybersecurity fundamentals, and hardware/software integrations. Skilled in building and troubleshooting wired/wireless networks, deploying Linux servers, managing virtualized environments, and working with routing, switching, DNS, DHCP, and firewall concepts. Proficient in Python, Java, SQL, Bash, and automation workflows, with experience using tools such as Wireshark, Packet Tracer, and virtualization platforms. Recognized for strong communication, leadership, and mentoring through campus roles. Passionate about secure network infrastructure, scalable system design, and applying technical skills to real-world challenges.

EDUCATION

Bachelor of Science, Engineering Technology

Concentration: Computer Network System Management (CNSM)

May 2027

San Jose State University, San Jose, CA, GPA: - 3.6

Minor:- Business, Computer Science

SKILLS

Networking & Security: TCP/IP, UDP, DNS, DHCP, VLANs, Subnetting, NAT, IPv4/IPv6, OSPF, VPNs, Firewalls, BGP

Programming: Python, Java, SQL, Bash, Pandas, Web Scraping, Data Analysis, Configuration scripting

Cloud & Virtualization: AWS EC2, S3, IAM, Cloud Networking Basics, Virtual Machines, Containers (Docker)

Systems & Tools: Linux, Windows, macOS, Cisco CLI, Arduino, Raspberry Pi, Virtualization Platforms

WORK EXPERIENCE

Peer Academic Success Coach, UHS SJSU

Aug 2024 - Present

- Deliver academic advising and holistic support to over 100 first-year students, helping students navigate college life and establish academic goals.
- Design and implement engagement programs, boosting residential community involvement by 30% through targeted workshops and events.
- Acquire skills in student development and coaching, leading to a 95% positive feedback rate in student surveys.

Testing Engineer Intern, UL Solutions

May 2025 - Aug 2025

- Performed wireless compliance testing for Wi-Fi, BLE, and LTE modules, validating RF performance, power levels, and communication stability against regulatory standards.
- Automated test workflows using Python and Bash to streamline data collection, reduce manual test time, and improve reproducibility across wireless evaluations.
- Operated SAR testing systems and conducted dielectric liquid verification checks to ensure accuracy of RF exposure measurements and support product compliance reporting.

CERTIFICATIONS

- Cisco Certified Support Technician (CCST) – Networking Dec 2025
- CCNA: Enterprise Networking, Security, and Automation - Cisco Networking Academy Aug 2025
- Excel Essential Training (Microsoft Office) Jan 2024

PROJECT EXPERIENCE

Hear the Light – LED Sound Level Meter, SJSU

May 2025

- Designed and built a sound-level meter using Arduino and LEDs to visualize ambient noise levels.
- Integrated microphone sensor with Arduino Uno to capture sound input and programmed real-time LED responses.
- Enhanced understanding of embedded systems, sensors, and signal processing.

Line Following Robot, SJSU

Dec 2023

- Developed an autonomous line-following robot with Arduino, using infrared sensors for precision tracking.
- Integrated hardware and coding to create a line-following robot achieving over 95% accuracy in sensor-based tracking.
- Demonstrated expertise by programming and calibrating sensors to operate on varied surfaces and speeds, enhancing functionality and control by 40%.

ACTIVITIES

Network Engineering Technology Society (NETS), Member

Jan 2025 - Present

- Volunteered in workshops and events focused on networking, cloud systems, and cybersecurity.
- Collaborated with peers on technical projects to broaden practical knowledge in emerging technologies.

INTERESTS

- Homelab, Soccer, Gaming, Music
